PROFESSIONAL SUMMARY

Senior Full-Stack Developer with 6+ years of experience designing and delivering scalable web applications, AI-powered platforms, and distributed backend systems. Lead developer of Joyfullwell platform, an AI-powered SaaS platform built end-to-end for the childcare industry. Deep expertise in Node.js, React.js, TypeScript, PostgreSQL, and Redis. Proven track record building SaaS products across healthcare, insurance, legal, real estate, and childcare/education sectors. Experienced with AI orchestration, RAG pipelines, multi-agent architectures, multi-tenant architecture, and cloud-native deployments on AWS and Azure. Adept at leading Agile teams, implementing CI/CD pipelines, and shipping production-grade microservices.

CORE COMPETENCIES

Frontend: React.js, Next.js, TypeScript, Vue3.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, REST APIs, Microservices, WebSocket, Webhooks, Stripe payments, S3/AWS storage, EHR / FHIR / HL7
Databases: PostgreSQL, MongoDB, Redis
Cloud & DevOps: AWS, Azure, Docker, Kubernetes, CI/CD pipelines, Vercel, Netlify, Render, Git/GitHub
AI / ML: LLM Integration, Anthropic Claude, RAG (Retrieval-Augmented Generation), Prompt Engineering, AI Workflow Automation, AI agents, Twilio
Security: JWT, Auth0, Clerk, Session-based Auth, Role-based Access Control (RBAC)

WORK EXPERIENCE

Full Stack Developer May 2025 - Present

Joyfullwell | New York, NY

- Built a full-stack AI-powered SaaS platform for the childcare industry, from concept through production launch, owning frontend, backend, database, and AI integration.
- Architected a multi-tenant, role-based system supporting 5 distinct user roles (Super Admin, Corporate Manager, Center Director, Teacher, Parent) with granular access control and permissions.
- Built a full leads/CRM pipeline tracking families through a 6-stage enrollment funnel, including automated lead capture and marketing channel tracking.
- Integrated AI-powered features including automated report generation, enrollment prediction, at-risk payment flagging, and an AI voice assistant for handling parent calls.
- Built real-time reporting and communication tools giving parents live visibility into attendance, activities, and daily updates.
- Designed a multi-step company onboarding and admin approval workflow to support scalable client onboarding.
- Implemented billing and invoicing workflows with automated payment reminders and tuition tracking.
- Owned the product independently end-to-end — covering requirements gathering, architecture, development, QA, and documentation — personally validating every core feature prior to launch.

Senior Full-Stack Developer Dec 2020 - May 2025

Progton Software Technologies LLP | Remote

- Architected and deployed end-to-end MERN stack SaaS applications (Node.js, React.js, TypeScript, PostgreSQL) serving clients in healthcare, insurance, law, and real estate.
- Reduced page load times by 37% through code splitting, lazy loading, and caching optimizations.
- Improved API response time by 35% via database query optimization and indexing strategies.
- Designed and integrated RESTful APIs that increased data processing efficiency and system throughput.
- Implemented secure authentication systems using JWT, OAuth 2.0, and role-based access control (RBAC).
- Managed cloud deployments across AWS and Azure, maintaining 99.9% uptime SLA.
- Built responsive, cross-browser-compatible UI/UX components following accessibility best practices.
- Collaborated with cross-functional Agile teams; managed version control workflows via Git and GitHub.

KEY PROJECTS

Joyfullwell: AI-powered childcare management SaaS with CRM, multi-role access, billing, and AI voice assistant.
Homecare Agency Management SaaS: End-to-end platform for scheduling, billing, and compliance for home care agencies.
Expense & Invoice Management System: Automated financial tracking tool with reporting dashboards for SMBs.
Applicant Tracking System (ATS): Full-featured recruitment platform with role-based access and pipeline management.
E-Commerce Web App (MERN): Scalable storefront with payment integration, inventory management, and admin portal.
Hospital Management System: Full-stack system for patient records, appointment scheduling, and staff management.

EDUCATION

Master of Science – Project Management (Information Technology) GPA: 3.5
St. Francis College, Brooklyn, NY | Jun 2024

Bachelor of Science – Engineering GPA: 3.5
Acharya Institute of Technology, Bangalore | Jun 2022
